Customer fields: a quick guide

The questions a customer must answer before buying a product: their email, player ID, phone number…

Where it is

Admin → **Products** → open a product → scroll down to **Customer fields (JSON)**, just above the Published checkbox.

The 4 steps

1. Pick the page for what you want to ask (email, number, text, phone).
2. Delete what is in the box (it shows `[ ]` when there are no questions).
3. Copy the blue box from that page and paste it in. Change the words in quotes if you want.
4. Click **Save product**. Open the product in the store to check the question shows.

The 4 types

Type	Write	The customer can type	Example
Email	"type": "email"	A real email address only	Netflix, gift card sent by email
Number	"type": "number"	Digits only (0-9)	Free Fire player ID
Text	"type": "text"	Anything	Username, account name
Phone	"type": "tel"	Phone number, phone keypad opens	Digicel / Natcom top-up

What each part means

`key`	A short code name for you. Letters and numbers only, no spaces, starts with a letter, different for each question (email, playerId, zoneId).
`label`	The question shown to the customer, in each language: ht, fr, en, es.
`type`	email, number, text or tel (see table above).
`required`	true = the customer can't buy without answering. false = optional.
`placeholder`	Optional. Grey example text inside the empty box.

Only change the words between quotes after ht, fr, en, es and placeholder. Keep every { } [ ] , : and " exactly where it is.

TYPE 1 · EMAIL

Ask for the customer's email

Use this when the code or the account is sent to an email, or when you need it to log in to the customer's account.

Copy this exactly into the box

```
[
  {
    "key": "email",
    "label": {
      "ht": "Imèl",
      "fr": "E-mail",
      "en": "Email",
      "es": "Correo"
    },
    "type": "email",
    "required": true,
    "placeholder": "non@egzanp.com"
  }
]
```

Accepted

jean@gmail.com, ti.marie@yahoo.fr

Refused at checkout

jean@gmail (no .com), jean gmail.com, empty when required

Good for

Netflix, Spotify, gift cards sent by email, Meru account top-up.

Want the email to be optional? Change `"required": true` to `"required": false`.

TYPE 2 · NUMBER

Ask for a player ID (digits only)

Use this for games where the ID is only digits. Letters, spaces and dashes are refused, so fewer typing mistakes.

Copy this exactly into the box

```
[
  {
    "key": "playerId",
    "label": {
      "ht": "ID jwè",
      "fr": "ID joueur",
      "en": "Player ID",
      "es": "ID de jugador"
    },
    "type": "number",
    "required": true,
    "placeholder": "123456789"
  }
]
```

Accepted

123456789

Refused at checkout

12345abc, 123 456 (space), 123-456

Good for

Free Fire, PUBG Mobile, Call of Duty Mobile.

If an ID can start with a letter or has a dash, use the **Text** type instead (next page).

TYPE 3 · TEXT

Ask for a username or anything else

The most flexible type: letters, numbers and symbols are all accepted. Use it when nothing else fits.

Copy this exactly into the box

```
[
  {
    "key": "username",
    "label": {
      "ht": "Non itilizatè",
      "fr": "Nom d'utilisateur",
      "en": "Username",
      "es": "Usuario"
    },
    "type": "text",
    "required": true
  }
]
```

Accepted

Jean_Gamer509, any text up to 100 characters

Refused at checkout

Only an empty box, when required

Good for

Usernames, Roblox, account names, notes.

Example for your Meru product

Customers may know their Meru email or their number, so a text field accepts both:

Copy this exactly into the box

```
[
  {
    "key": "meruAccount",
    "label": {
      "ht": "Imèl oswa nimewo kont Meru",
      "fr": "E-mail ou numéro du compte Meru",
      "en": "Meru account email or number",
      "es": "Correo o número de la cuenta Meru"
    },
    "type": "text",
    "required": true
  }
]
```

TYPE 4 · PHONE

Ask for a phone number

Opens the phone keypad on mobile. Use it for airtime top-ups or when the staff must contact the customer.

Copy this exactly into the box

```
[
  {
    "key": "phone",
    "label": {
      "ht": "Nimewo telefòn",
      "fr": "Téléphone",
      "en": "Phone number",
      "es": "Teléfono"
    },
    "type": "tel",
    "required": true,
    "placeholder": "+509 3700 0000"
  }
]
```

Accepted

+509 3700 0000, 37000000

Refused at checkout

Empty when required

Good for

Digicel and Natcom airtime, WhatsApp delivery.

TWO QUESTIONS OR MORE

Ask several things on one product

Put the questions one after the other inside the same [ ], with a **comma between them** (after the closing }). No comma after the last one. Up to 8 questions.

Player ID + Server (Mobile Legends)

Copy this exactly into the box

```
[
  {
    "key": "playerId",
    "label": {
      "ht": "ID jwè",
      "fr": "ID joueur",
      "en": "Player ID",
      "es": "ID de jugador"
    },
    "type": "number",
    "required": true,
    "placeholder": "123456789"
  },
  {
    "key": "zoneId",
    "label": {
      "ht": "Sèvè / Zòn",
      "fr": "Serveur / Zone",
      "en": "Server / Zone",
      "es": "Servidor / Zona"
    },
    "type": "number",
    "required": true,
    "placeholder": "1234"
  }
]
```

Email + phone (phone optional)

Copy this exactly into the box

```
[
  {
    "key": "email",
    "label": {
      "ht": "Imèl",
      "fr": "E-mail",
      "en": "Email",
      "es": "Correo"
    },
    "type": "email",
    "required": true,
    "placeholder": "non@egzanp.com"
  },
  {
    "key": "phone",
    "label": {
      "ht": "Nimewo telefòn",
      "fr": "Téléphone",
      "en": "Phone number",
      "es": "Teléfono"
    },
    "type": "tel",
    "required": false,
    "placeholder": "+509 3700 0000"
  }
]
```

IF IT DOESN'T SAVE

"Custom fields JSON is invalid"

The site refuses anything it can't read, so a mistake never breaks the store. Check these, most common first:

Curly quotes	Phones and Word change " into “ ”. Copy from this PDF on a computer, or turn off "Smart punctuation" on iPhone (Settings → General → Keyboard).
Missing comma	Between two questions you need },{ . Every line inside { } ends with a comma except the last one.
Extra comma	No comma after the last question or the last line: "required": true, } is wrong.
Wrong type	Only email, number, text or tel. Not "phone" or "Email" (lowercase).
true / false	Written without quotes: "required": true, not "required": "true".
Same key twice	Each question needs its own key: email and email2, not email twice.
Key with space	"player id" is wrong. Use "playerId".
No questions	Leave [] in the box. Don't leave it completely empty.

Where do I see the answers? Admin → Orders → open the order. The customer's answers show under each item, and the customer can reuse them next time.
